

THESIS WRITING SERVICE

As a child, I remember my dad would take multiple trips to places around the world, each time returning to bring me some trinket he had found during his travels. As a geologist, he was able to explore vast areas of uninhabited space, documenting the composition of land throughout the world for analysis and research. I especially loved his trips to Hong Kong, because he would always bring back some exotic candy, fruit preserve, or noisemaker back for me. As I grew older, I promised that one day I would visit this land myself, and for this reason I hope to be able to attend the University of Hong Kong for my undergraduate studies.

Hong Kong draws me in for more than simply my fond childhood memories. I hope to study business and one day serve as a consultant for international business leadership. To be able to do so, I will need exposure to other cultures and modes of thinking, something which Hong Kong University is renowned for. As a major metropolitan hub of the East, not only will my education at Hong Kong University enhance my academic knowledge, it will also give me firsthand experience in the practice of international business relations.

The Business degree program at Hong Kong University is known throughout the world for its highly interactive curriculum and focus on real-world applications for its students. As a pupil of the program, I look forward to the integrated internship experiences, where I will have the opportunity to translate my classroom knowledge to taking on management projects in an actual corporate setting. This experience will be invaluable to me in my future career, and it is a unique opportunity to learn and experience the world that I would be honored to take part of as a student of Hong Kong University.
